Important info

Pollination and maturity

Information in this document has been collated from our suppliers, staff and other sources, and may not reflect your local conditions. We make no guarantees as to its accuracy and it should be used as a guide only. **Pollination:** For trees that aren't self-fertile, to produce fruit they'll need at least one other compatible variety for cross-pollination. The list of pollinators for each tree is based on the varieties that we sell and isn't comprehensive. If you've got other varieties planted nearby, these may well produce viable pollen for cross-pollination. **Triploid apple varieties:** Triploid apples don't produce viable pollen to cross-pollinate other apple trees. It's recommended that you plant two or more other compatible varieties with triploids for best results. **Partially self-fertile:** These varieties will produce some fruit on their own but a cross-pollinator is recommended for a larger crop.

Ordering and deposit

To place an order, simply email the completed form or the varieties and quantities you're after to david@greenhillnursery.com.au or print a copy and return it to the nursery. Once we've confirmed we can fulfil your order you'll need to pay for it in full which can be done over the phone with a Visa or MasterCard, in person at the nursery, or funds transfer to our bank account.

Supply and availability

Order fulfilment is subject to availability with our suppliers, as well as factors outside of our control (eg. damage during transit, crop failure, weather events, etc.). If we become aware of any issues affecting fulfilment of your order, we'll notify you as soon as possible.

Collection and payment

We'll notify you by phone or email when your order is ready for collection. Fruit trees are to be collected from Greenhill Nursery and paid for by 31 July 2018, or within 2 weeks of placing an order. Where no prior arrangements have been agreed to with Greenhill Nursery, orders not collected and fully paid for by this date will result in loss of deposit, and stock will be returned for sale. If you're unable to collect your order on time, for \$16.50 per tree we can prune and pot your trees into 30cm pots. Full payment for your trees and this potting service would need to be paid for beforehand, and trees would need to be collected no later than 31 August 2018.

Pruning, planting and caring for your trees

When you collect your trees we're happy to prune them for you or show you how to do it yourself, and give you any advice you need on planting and caring for them. You're also welcome to call us if you need any help. Provided you've adequately cared for your bare root trees, in most cases they'll break dormancy in spring, but it's not uncommon that they'll show few signs of life until as late as December and sometimes into January. If you think a tree you've purchased from us has died, please don't remove it from the ground and instead call us on (03) 6239 6850.

Refunds, returns and exchanges

Greenhill Nursery and its suppliers take great care to ensure we supply you with healthy and hardy bare root trees. In fact, each season we use the same trees in our nursery for our potting stock and our failure rates are less than 1%! However, once bare root trees leave the nursery there are many factors outside of our control that determine their chances of survival such as: the drying out of roots; delays in planting; incorrect pruning; under and over watering; amount and type of fertilisers used; soil type and condition; pests including insects and animals; air, soil and waterborne diseases; and other environmental and climatic conditions. For this reason we don't offer refunds, returns or exchanges, except where we've determined stock to be defective, or in accordance with Australian consumer law. If you experience any issues with your bare root trees, please phone us on (03) 6239 6850.
